

CLIMBER LARGE

Borlotti bean

Phaseolus vulgaris This climbing crop is grown for its beans, which are borne in long green pods, often flushed red. Harvest the beans while young and tender to eat fresh, or leave to mature fully for drying. Provide support; water and feed well.

↑6ft (1.8m)

PERENNIAL SMALL

Oregano

Origanum 'Kent Beauty' A spreading perennial herb with trailing stems of small oval aromatic leaves and unusual pale pink summer blooms. It is grown for ornament; plant *O. vulgare* for culinary purposes. Ideal for baskets and windowboxes.

↑8in (20cm) ↔12in (30cm)

☪ Z6–9

CLIMBER LARGE

French bean

Phaseolus vulgaris This climber bears long, rounded green or purple pods all summer. For the best crop, harvest before the seeds swell. Dwarf and tall varieties are available. Grow in large pots, provide support, and water and feed well.

↑6ft (1.8m)

ANNUAL/BIENNIAL MEDIUM

Parsley

Petroselinum crispum This clump-forming biennial, best grown as an annual, has divided, green aromatic leaves, which are used as an edible garnish and to flavor various dishes. Grow in pots and windowboxes; water well in summer.

↑32in (80cm) ↔24in (60cm)

☪ Z5–9

PERENNIAL SMALL

Tomatillo

Physalis ixocarpa This tender perennial produces large green leaves, yellow flowers, and tangy-tasting fruits that are concealed within papery cases from mid-to late summer. Ideal for large pots, it needs full sun and a long summer to crop well.

↑18in (45cm) ↔24in (60cm)

☪ Z9–11(N)

CLIMBER SMALL

Runner bean

Phaseolus coccineus Suitable for large containers, this climbing bean bears long flattened green pods throughout summer. For the best crop, harvest pods regularly, before the beans inside are fully formed. It needs tall supports; water and feed well.

↑6ft (1.8m)

ANNUAL/BIENNIAL MEDIUM

Garden pea

Pisum sativum This form of pea is grown for traditional podded peas that appear from late spring to fall. Climbing or dwarf varieties are available. Plant or sow in large containers from spring to early summer. Water well and pick regularly.

↑28in (70cm) ↔20in (50cm)

ANNUAL/BIENNIAL MEDIUM

Snow pea

Pisum sativum This form of pea is sown or planted in spring or early summer. From late spring to fall, it bears flattened crisp pods, which are eaten whole. Grow in large containers, water regularly and harvest often for the best crop.

↑3ft (1m) ↔4in (10cm)

ANNUAL/BIENNIAL MEDIUM

Sugar snap pea

Pisum sativum Sown from seed in spring or early summer, this climbing plant produces crisp pods from late spring to fall. Pick regularly, before the seeds inside are fully formed, and eat whole. Ideal for large pots; water regularly.

↑24in (60cm) ↔20in (50cm)

TREE SMALL

Sour cherry

Prunus cerasus This tree bears white or pink flowers in spring, followed by sharp-tasting red fruits in summer. Choose self-fertile varieties on dwarfing rootstocks. Plant in large containers of soil-based potting mix. Water and feed regularly.

↑↔12ft (4m)

☪ Z4–8

TREE SMALL

Sweet cherry

Prunus cerasus This tree bears white or pink blossom in spring, followed by sweet-tasting fruits from summer to late fall. Select a self-fertile variety on a dwarfing rootstock. Plant in a large container of soil-based potting mix; water and feed well.
