

Plants for sandy soil

Free-draining sandy sites are generally more suited to sun-lovers, but there are a good number of plants that will cope with dry shade.

Most plants prefer dappled shade or sun for part of the day, but you can try experimenting with cranesbill, barrenwort, and lady's mantle in darker areas. Also consider painting walls and fences white or cream to reflect light into your garden to broaden your scope, and trim off the lower branches of shrubs and trees to allow more sun to filter through. Choose from a selection of shrubs such as viburnum, witch hazel, and mock orange for background structure, and seasonal bulbs and perennials to inject some color into your garden.

PERENNIAL SMALL

Alchemilla mollis

LADY'S MANTLE This perennial forms spreading clumps of rounded, pale green velvety leaves with crinkled edges. It produces small sprays of tiny, acid greenish yellow flowers in midsummer. Use it as ground cover or bed edging.

↑↔ 20in (50cm)

☀ Z4-7

BULB LARGE

Allium stipitatum

ORNAMENTAL ONION This upright perennial bulb produces strap-shaped gray-green leaves that wither as tall sturdy stems topped with spherical white flower heads appear in late spring. 'Violet Beauty' has violet-pink flower heads.

↑ 4½ft (1.4m)

☀ Z4-9

TREE MEDIUM

Amelanchier arborea

DOWNY SERVICEBERRY This is a small deciduous tree with a dense oval habit and copper-red young leaves that mature to green and then turn vivid red in fall. It also produces masses of white flowers in spring that lead to attractive red berries.

↑ 30ft (10m) ↔ 40ft (12m)

☀ Z4-9 (N)

TREE SMALL

Amelanchier canadensis

SHADBLOW SERVICEBERRY This dense upright tree or large deciduous shrub has oval white-haired leaves that age to dark green and turn orange-red in fall. Edible sweet and juicy summer fruits follow the starry white mid- to late spring flowers.

↑ 20ft (6m) ↔ 10ft (3m)

☀ Z3-7 (N)

TREE SMALL

Amelanchier laevis

ALLEGHENY SERVICEBERRY A spreading deciduous tree or large shrub with oval bronze leaves that turn dark green in summer, then red and orange in fall. It produces sprays of white flowers in spring, followed by round, juicy red fruits.

↑↔ 25ft (8m)

☀ ㅁ Z4-8 (N)

SHRUB LARGE

Amelanchier lamarckii

JUNE BERRY This spreading deciduous tree's or large shrub's bronze new leaves and airy sprays of starry white flowers open together from mid- to late spring. The mature foliage is dark green, but becomes brilliant red and orange in fall.

↑ 25ft (8m) ↔ 20ft (6m)

☀ ㅁ Z4-8 (N)

PERENNIAL MEDIUM

Anaphalis margaritacea

PEARLY EVERLASTING A bushy perennial with lance-shaped, gray-green or white-edged silvery gray leaves felted on the undersides. In late summer, papery, pearl-like white flower clusters form in profusion on erect stems. Plant in light shade.

↑ 30in (75cm) ↔ 24in (60cm)

☀ Z3-8 (N)

PERENNIAL SMALL

Anemone nemorosa

WOOD ANEMONE A vigorous carpeting perennial with deeply divided midgreen leaves. From spring to early summer, masses of starry white flowers appear. Varieties include 'Vestal', which has double flowers with buttonlike centers.

↑ 6in (15cm) ↔ 12in (30cm)

☀ ! Z4-8

PERENNIAL MEDIUM

Aquilegia vulgaris

COLUMBINE A clump-forming, upright perennial with gray-green leaves divided into rounded leaflets. Pink, crimson, blue, purple, and white bell-shaped flowers appear in late spring. 'William Guinness' (above) has maroon and white flowers.

↑ 3ft (1m) ↔ 20in (50cm)

☀ Z3-8

SHRUB LARGE

Aronia x prunifolia

PURPLE CHOKEBERRY This is an upright deciduous shrub with oval dark green leaves that turn bright red in fall. White spring flowers are followed by edible red or purple-black berries that are packed with antioxidants.

↑ 10ft (3m) ↔ 8ft (2.5m)

☀ Z4-8 (N)
