

PERENNIAL SMALL

Chicory

Cichorium intybus This green-leaved chicory has rounded heads of crisp bitter-tasting leaves. Planted in early summer, it can be harvested until spring, if protected. Grow in containers of potting mix; water well. Considered invasive in most areas.

↑↔ 12in (30cm) when harvested

Z4–8

PERENNIAL SMALL

Radicchio

Cichorium intybus This red-leaved chicory forms rounded heads of crisp bitter-tasting leaves. Planted in early summer, it can be harvested until spring, if protected. Grow it in containers of potting mix; water well. Considered invasive in some areas.

↑↔ 12in (30cm) when harvested

Z4–8

ANNUAL/BIENNIAL SMALL

Arugula

Eruca sativa This annual forms a rosette of long lobed leaves, which have a peppery flavor. Sow it directly in containers and windowboxes in spring and summer, and cut the leaves as required, leaving the base to regrow. Water well.

↑↔ 8in (20cm) when harvested

PERENNIAL LARGE

Fennel

Foeniculum vulgare This upright perennial bears aromatic fernlike leaves that taste of aniseed. Edible seeds follow the clusters of tiny yellow flowers. Grow it in large containers of soil-based potting mix in light shade. Considered invasive in some areas.

↑ 6ft (1.8m) ↔ 18in (45cm)

Z4–9

ANNUAL/BIENNIAL SMALL

Lettuce

Lactuca sativa Suitable for cropping young as “cut-and-come-again” leaves or left to mature into full heads, lettuce comes in many colors and textures. Sow or plant in spring, and keep plants well watered. Best in light shade only.

↑↔ 12in (30cm)

TREE SMALL

Cooking apple

Malus domestica This tree bears fruits from late summer to fall. Buy plants on dwarfing rootstocks to restrict their size. Plant in a large container of soil-based potting mix; feed and water regularly from spring to summer. Best in light shade.

↑↔ up to 8m (25ft)

Z4–8

ANNUAL/BIENNIAL SMALL

Florence fennel

Foeniculum vulgare* var. *azoricum This crop is grown for its swollen, aniseed-flavored leaf stems that form a “bulb” at the base of the plant. Sow seeds in summer, harvest young if large enough, or leave to reach full-size. Can be invasive.

↑↔ 12in (30cm)

ANNUAL/BIENNIAL SMALL

Cilantro

Coriandrum sativum This quick-growing annual herb has rounded, green aromatic leaves. The leaves, stems, and seeds can be used in cooking. Grown from seed, it is ideal for containers and windowboxes in light shade; water well to prevent bolting.

↑ 20in (50cm) ↔ 8in (20cm)

PERENNIAL SMALL

Alpine strawberries

Fragaria vesca Forming a low mound of toothed-edged leaves, this type of strawberry is ideal for containers. It bears small richly flavored fruits from early- to late summer. Water and feed plants regularly; best in light shade only.

↑ 12in (30cm) ↔ indefinite

Z5–9 (N)

TREE SMALL

Dessert apple

Malus domestica Many varieties are available, but choose one grafted onto a dwarfing rootstock to restrict its size. Ideal for large containers of soil-based potting mix; plant in light shade only. You may also need a pollinizer variety.

↑ up to 20ft (6m) ↔ up to 4m (12ft)
