

PERENNIAL MEDIUM

Lemon balm

Melissa officinalis This herb has toothed, textured green leaves that release a rich lemon scent when brushed. Remove the blooms in summer to encourage leaf growth. Grow in pots and windowboxes on its own. Considered invasive in some areas. ↑3ft (1m) ↔18in (45cm)

☀ Z4–9

PERENNIAL SMALL

Peppermint

Mentha x piperita A spreading perennial with spikes of pink-purple summer blooms and textured green aromatic leaves used to flavor dishes or as an infusion to make tea. Plant in containers of soil-based potting mix. Considered invasive in many areas. ↑20in (50cm) ↔3ft (1m)

☀ Z4–8

PERENNIAL SMALL

Spearmint

Mentha spicata This perennial has green, textured aromatic foliage and short spikes of pink summer blooms. Infuse the leaves to make tea or use to flavor dishes. Plant in a pot to prevent the roots from spreading. Considered invasive in most areas. ↑20in (50cm) ↔indefinite

☀ Z4–7

PERENNIAL SMALL

Oregano

Origanum vulgare This is a small, clump-forming perennial that forms a dense mat of rounded, aromatic green leaves. It may also produce tiny, mauve summer flowers. Use it to fill gaps in a partly shaded rock garden. ↑↔18in (45cm)

☀ Z4–8

ANNUAL/BIENNIAL MEDIUM

Parsley

Petroselinum crispum This clump-forming biennial, best grown as an annual, has deeply divided, aromatic green leaves, which are commonly used for decorative edible garnishes and to flavor a wide range of dishes. ↑32in (80cm) ↔24in (60cm)

☀ Z5–9

CLIMBER SMALL

Runner bean

Phaseolus coccineus This climbing bean bears long flattened green pods all summer. Harvest regularly, before the seeds swell, for the best crop. Provide tall supports, and water and feed well. Ideal for large containers in light shade. ↑6ft (1.8m)

☀

ANNUAL/BIENNIAL MEDIUM

ANNUAL/BIENNIAL MEDIUM

Garden pea

Pisum sativum These traditional podded peas crop from late spring to autumn when sown in spring or early summer. Plant in large containers in light shade and water well. Dwarf and climbing varieties are available; harvest regularly. ↑28in (70cm) ↔20in (50cm)

☀

ANNUAL/BIENNIAL MEDIUM

Snow pea

Pisum sativum These peas are grown for their crisp flattened pods, which are produced from late spring to fall, and are eaten whole. Sow or plant in large containers in spring or early summer. Water well and pick regularly. ↑3ft (1m) ↔4in (10cm)

☀

Sugar snap pea

Pisum sativum This short climbing plant bears crisp pods from late spring to fall, if sown in spring or early summer. The pea pods are eaten whole. Best planted in large containers in light shade; keep well watered and pick regularly. ↑24in (60cm) ↔20in (50cm)
