

SHRUB LARGE

Camellia x williamsii

CAMELLIA A bushy evergreen shrub with glossy, oval dark green leaves. It bears showy single or double blooms in shades of pink or white from early- to mid-spring. The upright 'Donation' (above) has pink flowers with golden stamens.

☀ pH Z7–9

SHRUB MEDIUM

Clethra alnifolia

SUMMERSWEET This bushy shrub has oval, serrated midgreen leaves that turn yellow in fall. In late summer, slender spires of small, fragrant, bell-shaped white blooms form. It is a good choice for damp soil, just beyond the tree canopies.

↑↔8ft (2.5m)

☀ Z3–9 (N)

PERENNIAL MEDIUM

Carex grayi

GRAY'S SEDGE This evergreen perennial has tufts of narrow, grassy bright green leaves. In summer, its upright stems are topped with clusters of green flowers that are followed by star-shaped greenish brown fruits. Plant on the edge of a woodland.

↑24in (60cm) ↔8in (20cm)

☀ Z5–9 (N)

SHRUB LARGE

Cornus mas

CORNELIAN CHERRY This spreading, open shrub has oval dark green leaves that turn reddish purple in fall. Rounded clusters of yellow star-shaped blooms form on bare stems in late winter, followed by edible red fruits. Suitable for light shade only.

↑↔15ft (5m)

☀ Z4–8

PERENNIAL MEDIUM

Carex buchananii

LEATHERLEAF SEDGE This evergreen perennial has narrow, grasslike upward, then arching, copper-colored leaves, red toward the base. Triangular stems bear brown flower clusters in summer. Grow in groups on the edge of a woodland garden.

↑24in (60cm) ↔8in (20cm)

☀ Z6–9

PERENNIAL MEDIUM

Chelone glabra

TURTLEHEAD This medium-sized upright perennial produces oval midgreen leaves. From late summer to early fall, unusual, two-lipped white flowers appear. It is best planted just beyond the tree canopies.

↑up to 3ft (1m) ↔18in (45cm)

☀ pH Z3–8 (N)

BULB MEDIUM

Chionodoxa forbesii

GLORY OF THE SNOW This perennial bulb bears grasslike foliage and small, purple-blue flowers with white centers in early spring. Plant the bulbs in large groups in fall in soil that will not dry out in summer.

↑6in (15cm)

☀ Z3–8

PERENNIAL SMALL

Corydalis flexuosa

BLUE CORYDALIS An upright perennial with gray-blue-tinged ferny leaves. From late spring to summer, sprays of tubular blue flowers with white throats form. It dies back completely in summer. Plant it in dappled shade beneath deciduous trees.

↑12in (30cm) ↔8in (20cm)
