

PERENNIAL MEDIUM

Tellima grandiflora

FRINGE CUPS A clump-forming semievergreen perennial with serrated, heart-shaped, green-tinted purple leaves and, from late spring to midsummer, spikes of small, bell-shaped, fringed cream blooms. Allow it to naturalize in dappled shade.

↑↔ 24in (60cm)

☀ Z4–7 (N)

PERENNIAL MEDIUM

Tricyrtis formosana

TOAD LILY An upright, clump-forming, slow-spreading perennial with lance-shaped midgreen leaves and upturned clusters of intricately-shaped, purple-spotted white fall blooms. Fall frost may kill the flowers. Mulch annually with compost.

↑ 3ft (1m) ↔ 18in (45cm)

☀ Z5–9

PERENNIAL MEDIUM

Silene dioica

RED CAMPION This clump-forming semievergreen perennial has oval, dark green basal leaves. From late spring to midsummer, it bears clusters of small pink flowers. Use it to provide color in the dappled shade beneath tree canopies.

↑ 32in (80cm) ↔ 18in (45cm)

☀ Z6–9

PERENNIAL SMALL

Thalictrum kiusianum

DWARF MEADOW RUE This mat-forming perennial has small, fernlike, dark blue-green leaves. In early summer, it produces loose clusters of fluffy, pale purple-pink flowers with prominent stamens. Plant in part shade in soil that does not dry out.

↑ 3in (8cm) ↔ 6in (15cm)

☀ Z4–8

PERENNIAL SMALL

Trillium chloropetalum

GIANT WAKEROBIN This clump-forming perennial has gray- or maroon-marbled dark green leaves that form in groups of three. The large purplish pink to white flowers stand erect just above the leaves in spring. Thrives in partial shade.

↑↔ 18in (45cm)

☀ Z6–9 (N)

TREE MEDIUM

Styrax obassia

FRAGRANT SNOWBELL A spreading tree with rounded dark green leaves, blue-gray beneath, that turn yellow in fall. Long pendent clusters of fragrant, bell-shaped white flowers appear in early summer. Use it to create a woodland setting.

↑ 40ft (12m) ↔ 22ft (7m)

☀ Z5–8

PERENNIAL MEDIUM

Uvularia grandiflora

BELLWORT This clump-forming perennial has arching stems clothed in bright green lance-shaped leaves. Clusters of long, bell-shaped yellow flowers with twisted petals appear from mid- to late spring. Thrives in deep shade beneath trees.

↑ 24in (60cm) ↔ 12in (30cm)

☀ Z4–9 (N)

PERENNIAL SMALL

Tiarella wherryi

FOAMFLOWER This spreading evergreen perennial has lobed, pale green leaves with veins that turn bronze-red in winter. Spikes of fluffy white flowers appear from late spring to early summer. It makes excellent ground cover in deep shade.

↑ 8in (20cm) ↔ 12in (30cm) or more

☀ Z3–7 (N)
