

Plants for exposed sites

Grow spring bulbs, summer-flowering perennials, deciduous trees and shrubs for fall foliage, and frostproof evergreens to dress winter schemes.

Many ferns are unfazed by freezing temperatures and add a textural backdrop to colorful bulbs and perennials such as Siberian squill, iris, and columbine, while fragrant plants lend a sensory note to planting schemes; grapeholly, Solomon's seal, and spring-flowering daffodils will all help to perfume your plot. Large shrubs and trees can help shelter an exposed garden, but plant them on the north side to ensure that they don't cast even more shade. Also use tough hedging plants, such as hawthorn and yew, to create a warmer seating area; a shoulder-high screen will help protect a patio.

PERENNIAL MEDIUM

Aquilegia vulgaris

COLUMBINE This upright perennial has green leaves divided into rounded lobed leaflets. From late spring to early summer, it bears pendent single or double flowers in shades of purple and blue to pink and white. Deadhead after flowering.

↑3ft (1m) ↔20in (50cm)

☀ Z3–8

PERENNIAL MEDIUM

Astilbe x ardensii 'Fanal'

ASTILBE A clump-forming perennial with attractive, deeply divided, fernlike dark green foliage. In summer, it produces dense spikes of feathery dark pink flowers on slim dark stems. Plant it in moist, fertile soil in partial shade.

↑24in (60cm) ↔18in (45cm)

☀ ԲԻ Z3–8

PERENNIAL SMALL

Adiantum aleuticum

WESTERN MAIDENHAIR FERN A deciduous or semievergreen fern with black-stalked midgreen fronds divided into oblong segments. New fronds may be tinged pink. It is tolerant of low temperatures, but avoid planting in deep shade.

↑↔18in (45cm)

☀ Z3–8 (N)

PERENNIAL SMALL

Alchemilla mollis

LADY'S MANTLE This clump-forming perennial has rounded pale green leaves with crinkled edges. In summer, small sprays of tiny, bright greenish yellow flowers appear. Ideal as a ground-cover plant; trim back untidy leaves.

↑↔20in (50cm)

☀ Z4–7

PERENNIAL LARGE

Athyrium filix-femina

LADY FERN This deciduous fern produces arching, lance-shaped pale green fronds divided into narrow segments with toothed-edged margins. It thrives in deep shade in moist, acidic soil, but avoid planting in windy sites.

↑4ft (1.2m) ↔3ft (1m)

☀ ԲԻ Z4–9 (N)

TREE LARGE

Betula utilis var. *jacquemontii*

HIMALAYAN BIRCH This vase-shaped deciduous tree is grown for its stunning white bark. Its diamond-shaped leaves turn yellow in fall. Use it as a specimen or to make a small copse.

↑60ft (18m) ↔30ft (10m)

☀ Z4–7

PERENNIAL MEDIUM

Blechnum spicant

DEER FERN This evergreen fern has narrow, lance-shaped dark green fronds divided into linear segments. Good in deep shade in cold and exposed gardens where the soil is reliably moist year round. Remove old foliage in spring.

↑30in (75cm) ↔18in (45cm)

☀ Z5–8 (N)

SHRUB SMALL

Calluna vulgaris

SCOTCH HEATHER A bushy, low-growing evergreen shrub with tiny gray, yellow, or bright green leaves and bell-shaped single or double flowers in shades of pink, white, and purple from midsummer to late fall. Survives cold weather if protected.

↑12in (30cm) ↔14in (35cm)

☀ ԲԻ Z4–6

TREE SMALL

Crataegus crus-gali

COCKSPUR HAWTHORN A small deciduous tree, var. *inermis* has thornless branches and glossy dark green leaves that turn bright red in fall. It flowers for a short period in late spring, and bears red berries, attractive to birds. Suitable for windy or cold sites.

↑25ft (8m) ↔30ft (10m)

☀ Z4–7 (N)

PERENNIAL MEDIUM

Crococsmia x crocosmiiflora

MONTBRETIA An upright perennial with arching, sword-shaped green leaves and, from summer to early fall, clusters of small trumpet-like blooms. 'Star of the East' (above) has apricot-yellow flowers. Considered invasive in some coastal areas.

↑28in (70cm) ↔3in (8cm)

☀ Z6–9
