

ANNUAL/BIENNIAL SMALL

Limnanthes douglasii

POACHED-EGG FLOWER This low-growing spreading annual has ferny foliage and, from summer to fall, rounded yellow-centered white blooms. An insect magnet, plant it at the front of cottage beds, along path edges, and in gravel beds.

↑6in (15cm) ↔4in (10cm)

☀️ ☀️ (N)

SHRUB MEDIUM

Mahonia x media

MAHONIA This winter-flowering evergreen shrub provides valuable nectar to early emerging insects when few other plants are in bloom. Chains of blue-black edible berries, which are loved by birds follow the flowers. Consider using native *M. aquifolium*.

↑15ft (5m) ↔12ft (4m)

☀️ ☀️ ☀️ Z7–9

PERENNIAL MEDIUM

Knautia macedonica

KNAUTIA This upright perennial has lobed basal leaves and, in summer, a succession of buttonlike crimson flowers on wiry stems. Combine this bee and butterfly attractor with ornamental grasses for a meadow effect.

↑30in (75cm) ↔24in (60cm)

☀️ ☀️ Z5–9

PERENNIAL SMALL

Linaria alpina

ALPINE TOADFLAX This short-lived perennial bee attractor bears trailing stems with a succession of snap-dragon-like, orange-centered purple-violet flowers in summer. Allow it to trail over walls and raised beds, or spread through a gravel bed.

↑→6in (15cm)

☀️ ☀️ Z4–9

PERENNIAL MEDIUM

Maianthemum racemosum

FALSE SPIKENARD This upright perennial has prominently veined, oval green leaves and, from mid to late spring, scented, fluffy cream plumes, sometimes followed by red berries. Plant it to provide a wildlife habitat; shelter from strong winds.

↑3ft (1m) ↔24in (60cm)

☀️ ☀️ ☀️ Z3–8 (N)

SHRUB SMALL

Lavandula angustifolia

ENGLISH LAVENDER An evergreen subshrub with linear, aromatic silvery gray leaves. In midsummer, it produces a profusion of small, fragrant violet-blue flower heads that are irresistible to bees. Try it with self-seeded California poppies.

↑32in (80cm) ↔24in (60cm)

☀️ ☀️ Z5–8

TREE MEDIUM

Malus x moerlandsii
'Profusion'

FLOWERING CRABAPPLE A deciduous tree with pink spring blooms, which provide nectar for insects, followed by crab apples that ripen to deep purple in fall and are loved by birds. Provides habitat and nesting sites.

↑→30ft (10m)

☀️ ☀️ Z4–8

SHRUB MEDIUM

Leycesteria formosa

HIMALAYAN HONEYSUCKLE This deciduous shrub has large heart-shaped leaves and pendent chains of white summer blooms that attract bees and insects. Black berries in fall provide food for birds. Plant it at the back of a border; it may self-seed.

↑→6ft (2m)

☀️ ☀️ ☀️ Z7–9

CLIMBER LARGE

Lonicera periclymenum

WOODBINE This climber has fragrant, nectar-rich red and white summer flowers that attract pollinating butterflies and insects. Glossy red berries appear from late summer to fall. Mature woody plants offer habitat. Considered invasive in some areas.

↑22ft (7m)

☀️ ☀️ ☀️ Z5–9

PERENNIAL SMALL

Meconopsis cambrica

WELSH POPPY This perennial has light green divided leaves and lemon-yellow or orange poppy-like blooms that are borne in succession on slim stems from late spring to early summer. Plants colonize beside shaded walls and in gravel.

↑18in (45cm) ↔12in (30cm)
