

PERENNIAL MEDIUM

***Monarda* 'Cambridge Scarlet'**

BEEBALM This upright clump-forming perennial has aromatic dark green leaves and trumpet-shaped whorls of red summer blooms that attract bees and pollinating insects. Leave the spent stems standing for insect habitats and fall interest.

↑3ft (1m) ↔18in (45cm)

☀️ ☀️ ☀️ Z3-9 (N)

PERENNIAL LARGE

Monarda fistulosa

WILD BERGAMOT This clump-forming perennial bears whorled heads of small, two-lipped pale lilac blooms on tall stems in midsummer. The flowers attract bees and butterflies. Grow at the edge of a woodland garden or in a prairie-style setting.

↑4ft (1.2m) ↔18in (45cm)

☀️ ☀️ ☀️ Z3-9 (N)

BULB MEDIUM

Muscari armeniacum

GRAPE HYACINTH A spring-flowering perennial bulb with narrow grassy leaves and cone-shaped clusters of small, fragrant, bell-shaped deep blue flowers, which attract early emerging butterflies and bees. Allow it to naturalize in wild gardens.

↑8in (20cm)

☀️ ☀️ ☀️ Z4-8

PERENNIAL MEDIUM

Panicum virgatum

SWITCH GRASS A clump-forming deciduous grass with blue-green leaves and clouds of pink-tinged green flower heads in summer. Gives a naturalistic appeal to gardens, and offers habitat, food, and nesting material to birds, mammals, and insects.

↑3ft (1m) ↔30in (75cm)

☀️ ☀️ ☀️ Z5-9 (N)

BULB LARGE

Nectaroscordum siculum

MEDITERRANEAN BELLS An upright bulb with narrow leaves that fade as fountain-shaped clusters of pendent, bell-shaped cream and purple flowers emerge in early summer. Attractive seedheads follow the blooms. Try naturalizing it in meadows.

↑4ft (1.2m)

☀️ ☀️ ☀️ Z6-10

PERENNIAL SMALL

Nepeta x faassenii

CATMINT This bushy perennial has small, grayish green aromatic leaves and spikes of lilac-purple flowers, irresistible to bees, from summer to fall. Cut back between flushes for repeat flowering. Plant at the front of cottage beds or as path edging.

↑↔18in (45cm)

☀️ ☀️ ☀️ Z4-8

TREE LARGE

Nyssa sylvatica

BLACK GUM This broadly conical graceful tree has insignificant greenish yellow late spring flowers, visited by honeybees. Deep blue fruits on female plants attract birds in fall when the oval leaves develop rich red or yellow shades.

↑70ft (20m) ↔30ft (10m)

☀️ ☀️ ☀️ pH Z4-9 (N)

ANNUAL/BIENNIAL MEDIUM

Papaver rhoeas

CORN POPPY This annual wildflower produces divided leaves and bowl-shaped, black-centered scarlet blooms in summer. Sow seeds in spring or fall, and turn over the soil annually to ensure repeat germination.

↑24in (60cm) ↔6in (15cm)

☀️ ☀️

PERENNIAL SMALL

Primula veris

COWSLIP This evergreen or semievergreen perennial forms rosettes of corrugated, oval to lance-shaped leaves. Tight clusters of fragrant, nodding, butter-yellow tubular flowers appear on stout stems in spring. It is attractive to bees and butterflies.

↑↔10in (25cm)

☀️ ☀️ ☀️ Z3-8
