

SHRUB LARGE

Rhododendron luteum

PONTIC AZALEA A spring-flowering deciduous shrub with oblong- to lance-shaped leaves, which develop bold autumn shades and fragrant, funnel-shaped yellow flowers. Plant in a cool site and fertile soil.

↕↔12ft (4m)

Z7–9

TREE MEDIUM

Prunus virginiana

CHOKECHERRY This suckering tree or shrub for wild gardens has short spikes of white flowers in spring, that are followed by red fruits, ripening to black. It attracts birds and other wildlife. Varieties include 'Schubert' (above), with dark purple oval leaves.

↕30ft (10m) ↔25ft (8m)

Z2–7 Ⓝ

PERENNIAL SMALL

Pulmonaria angustifolia

BLUE LUNGWORT Forming a low clump of matte midgreen leaves, this spreading perennial bears blue trumpet-shaped blooms in spring. It gives nectar for early emerging insects. The leaves die back in summer; remove spent growth to keep tidy.

↕9in (23cm) ↔12in (30cm) or more

Z3–7

TREE LARGE

Quercus rubra

RED OAK This large forest tree with a spreading crown has leaves with pointed lobes that turn rich reddish brown in fall, when the acorns ripen. Oaks feed native insects, including moths, and acorns are eaten by birds and mammals.

↕80ft (25m) ↔70ft (20m)

Z4–8 Ⓝ

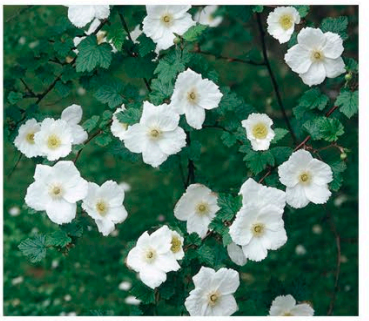

PERENNIAL SMALL

Scabiosa lucida

GLOSSY SCABIOUS Plant this small, neat scabious with its basal clump of divided gray-green leaves and pale-lilac pincushion blooms from spring to fall to attract bees and butterflies. Group plants at the front of a border or gravel bed.

↕8in (20cm) ↔6in (15cm)

Z5–9

SHRUB LARGE

Rubus species

BRAMBLE There are many species of blackberries, brambles, and raspberries. Some are grown for their edible fruits and others for their attractive foliage, winter shoots, or flowers in shades of white, pink, red, or purple.

↕↔10ft (3m)

Z5–9

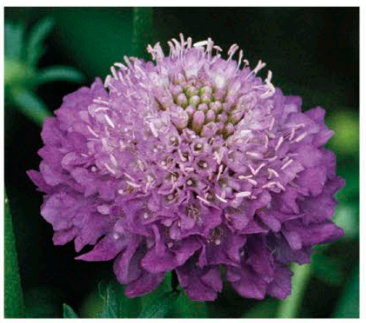

SHRUB LARGE

Sambucus nigra

BLACK ELDER This large bushy shrub or small tree has divided leaves and, in early summer, flat rounded heads of creamy white flowers, which develop into bunches of black berries, much sought after by birds.

↕↔20ft (6m)

Z5–8

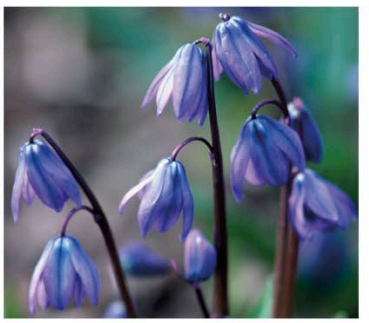

PERENNIAL MEDIUM

Scabiosa atropurpurea

PINCUSHION FLOWER This short-lived, clump-forming perennial, grown as an annual, has narrow toothed leaves and domed heads of purple summer flowers with creamy anthers. Attracts bees and butterflies. Considered invasive.

↕up to 3ft (1m) ↔12in (30cm)

Z8–11

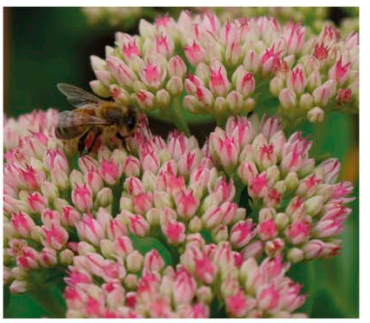

BULB MEDIUM

Scilla siberica

SIBERIAN SQUILL This perennial bulb with strap-shaped leaves and nodding, vivid blue bell-shaped flowers, attracts bees in spring. Plant the bulbs in drifts in fall, with spring-blooming perennials like primrose, bugle, and wood anemone.

↕8in (20cm)

Z4–8

PERENNIAL SMALL

Sedum spectabile

SHOWY STONECROP This fleshy perennial blooms in late summer and produces large, flattened pink flower heads, attracting bees, pollinating insects, and butterflies. After flowering, leave the spent heads standing to provide interest during winter.

↕↔18in (45cm)

Z3–9
