

PERENNIAL LARGE

Selinum wallichianum

WALLICH MILK PARSLEY An upright architectural perennial with fernlike leaves and long-lasting umbrella-shaped heads of starry white flowers borne in summer. The blooms attract insects; plant it for a meadow effect.

↑ 4ft (1.2m) ↔ 16in (40cm)

☀️ 🌞 Z7–10

PERENNIAL MEDIUM

Silene dioica

RED CAMPION A clump-forming semievergreen perennial with clusters of small vivid rose-pink flowers that appear from late spring to midsummer. Ideal for growing along hedgerows and in woodland areas. It attracts moths and butterflies.

↑ 32in (80cm) ↔ 18in (45cm)

☀️ 🌞 Z6–9

ANNUAL/BIENNIAL SMALL

Tagetes patula

FRENCH MARIGOLD This Mexican native annual has cut, aromatic dark green leaves and yellow, orange, red, or mahogany flowers, which appear from summer to early fall. For butterflies and other insects, choose single or semidouble varieties.

↑↔ 12in (30cm)

☀️ 🌞 (N)

PERENNIAL LARGE

Verbena bonariensis

PURPLETOP VERVAIN This versatile border perennial has "see-through" stems and, from midsummer to fall, domed clusters of violet-purple scented blooms that attract bees and butterflies. Considered invasive in some areas of the West Coast and in Southeast.

↑ 5ft (1.5m) ↔ 24in (60cm)

☀️ 🌞 Z7–11

PERENNIAL LARGE

Verbena hastata

AMERICAN BLUE VERVAIN This bushy upright perennial spreads by self-seeding. It has narrow toothed leaves and candelabra-like heads of violet-blue flowers that attract butterflies from midsummer to fall. 'Rosea' (above) has lilac-pink flowers.

↑ 5ft (1.5m) ↔ 24in (60cm)

☀️ 🌞 Z3–9 (N)

PERENNIAL MEDIUM

Tellima grandiflora

FRINGE CUPS A semievergreen perennial with heart-shaped, purple-tinged bright green leaves and, from late spring to midsummer, long spikes of small, bell-shaped cream flowers that provide nectar for insects. Grow in dry areas under trees.

↑↔ 24in (60cm)

☀️ 🌞 Z4–7 (N)

PERENNIAL LARGE

Thalictrum aquilegifolium

MEADOW RUE This perennial has clusters of fluffy lilac-purple summer flowers and attractive seedheads, which appear above finely divided gray-green leaves. Grow it in wild areas or cottage-style borders to attract beneficial insects.

↑ 4ft (1.2m) ↔ 18in (45cm)

☀️ 🌞 Z5–8

SHRUB LARGE

Viburnum prunifolium

BLACKHAW VIBURNUM A deciduous shrub, ideal for hedging, with oval glossy leaves that turn red and purple-bronze in fall. From late spring to early summer, it forms lacy white flowers, attractive to butterflies. Birds love the blue-black fruits that follow.

↑ 15ft (5m) ↔ 12ft (4m)

☀️ 🌞 Z3–9 (N)
