

SHRUB LARGE

Disanthus cercidifolius

REDBUD HAZEL This bushy shrub, which thrives in moist soil and shade, has large, rounded to heart-shaped green leaves that color crimson, purple, and orange in fall, and are borne alongside small, scattered, starry maroon blooms.

☀ ☀ ☀ pH 5–8

SHRUB SMALL

Fothergilla gardenii

DWARF FOTHERGILLA Suitable for the middle of a bed, this dwarf shrub produces fragrant fluffy spring flowers followed by deep blue-green oval leaves. In fall, the foliage lights up with fiery red, orange, and yellow tints.

↑↔3ft (1m)

☀ ☀ ☀ pH 4–8 (N)

SHRUB MEDIUM

Fothergilla major

LARGE FOTHERGILLA The large rounded leaves of this medium-sized spring-flowering shrub with a dense bushy habit, light up with a brilliant scarlet display in fall, making a striking contrast when placed among dark evergreen plants.

↑8ft (2.5m) ↔6ft (2m)

☀ ☀ ☀ pH 5–8 (N)

PERENNIAL SMALL

Geranium x magnificum

SHOWY GERANIUM Although this ground-cover perennial is mainly grown for its violet-blue early summer blooms, its deeply cut leaves take on pale yellow, pink, or, sometimes, deep crimson tones, in fall as they age.

☀ ☀ pH 4–8

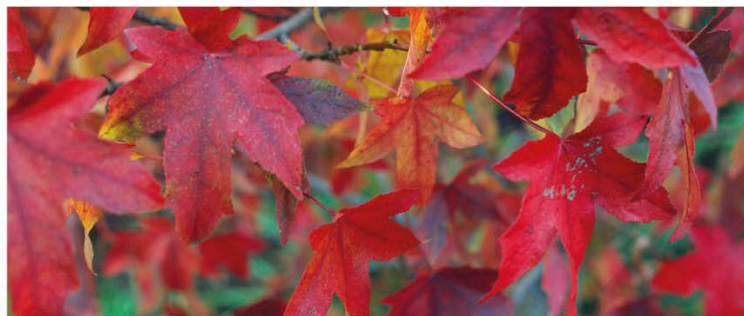

TREE MEDIUM

Nyssa sinensis

CHINESE TUPELO This medium-sized spreading tree or large shrub is grown for its spectacular fall color, when the narrow oval leaves take on magnificent amber-scarlet hues. It performs best in moist soil in a sheltered site.

↑↔30ft (10m)

☀ ☀ ☀ pH 7–9

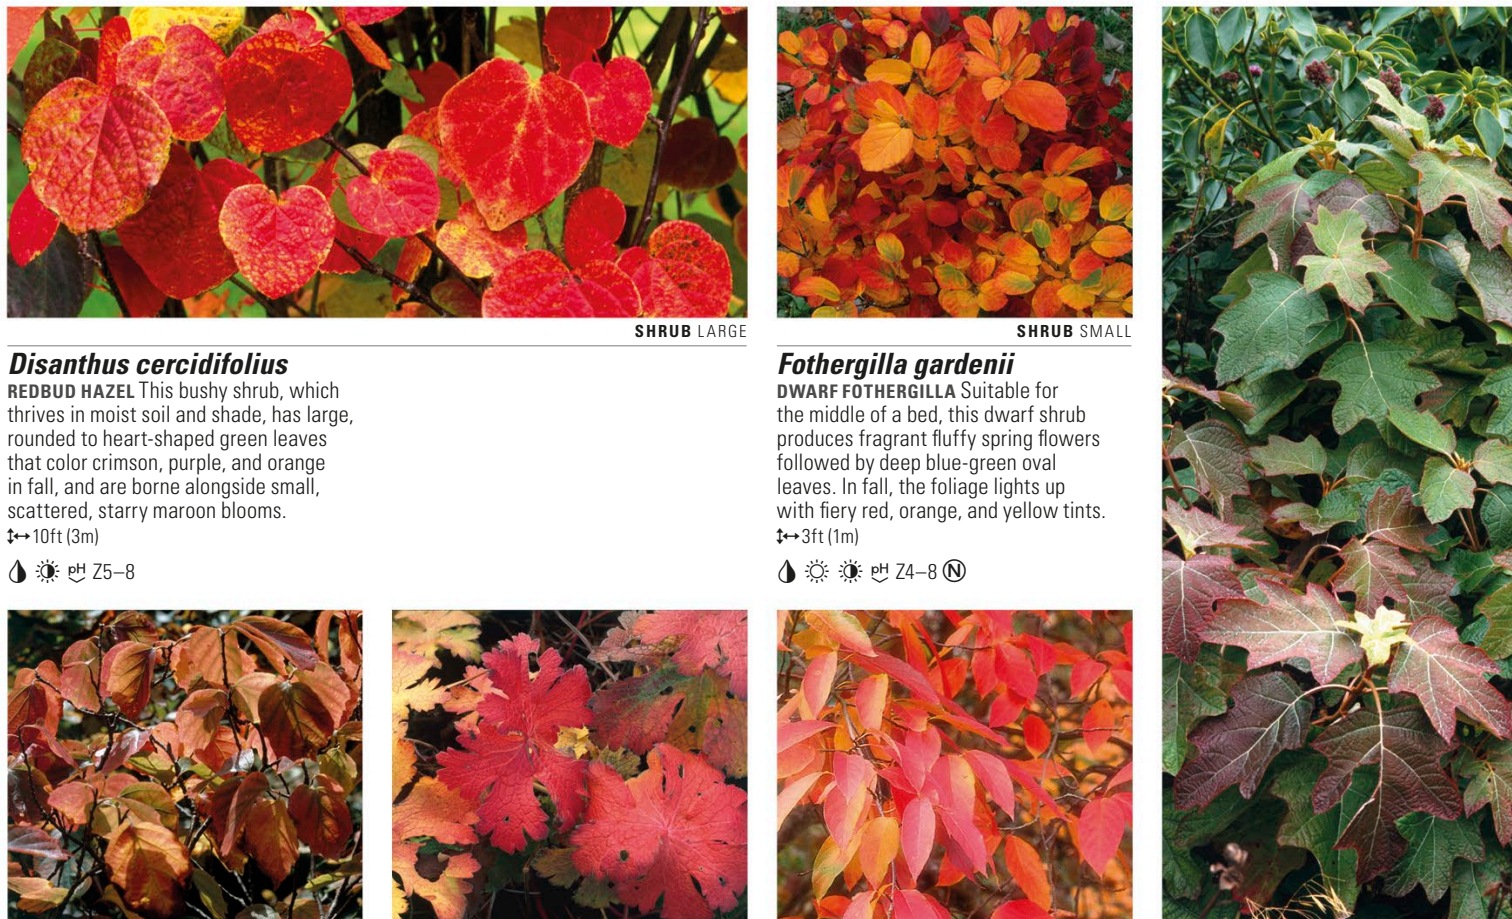

TREE LARGE

Liquidambar styraciflua

SWEETGUM Only suitable for large gardens, this deciduous tree is magnificent in fall when its lobed dark green leaves turn orange, red, and purple. Select one of the compact cultivars, such as 'Gum Ball', for a smaller garden.

↑80ft (25m) ↔40ft (12m)

☀ ☀ ☀ pH 5–9 (N)

SHRUB MEDIUM

Hydrangea quercifolia

OAKLEAF HYDRANGEA The lobed leaves of this shrub make a fine backdrop for the cream cone-shaped clusters of midsummer to fall blooms. In fall, after developing maroon tints, the leaves take on striking red and purple hues.

↑6ft (2m) ↔8ft (2.5m)

☀ ☀ ☀ pH 5–9 (N)

TREE SMALL

Parrotia persica

PERSIAN IRONWOOD This wide-spreading specimen tree or large shrub, sometimes multistemmed, has peeling bark. It is transformed in fall when the broad oval leaves turn red, purple, and amber, highlighting the veins.
