

Recipes for sunny sites

PROFUSE POND PERIMETER

A small artificial pond creates a beautiful oasis, reflecting light into the garden and attracting a wide range of birds, small animals, and aquatic wildlife. Decorate the water surface with a small hardy water lily, and create a boggy area around your pond for a range of flowers and foliage plants. This pond edge features giant rhubarb, together with colorful astilbe, and gold-flowered leopard plant, which also sports beautiful leaves that hold the interest before the blooms appear. A variegated tatarian dogwood will provide structure throughout the year with its colorful winter stems and decorative leaves in summer. In smaller spaces, replace the giant rhubarb with a more manageable rodgersia.

Plant list

- | | |
|------------------------------------|----------------------------------|
| 1 <i>Nymphaea pygmaea</i> | 4 <i>Cornus alba</i> |
| 2 <i>Astilbe x arendsii</i> | 'Elegantissima' |
| 3 <i>Ligularia dentata</i> | 5 <i>Gunnera manicata</i> |
