

MONOCHROME BORDER FOR CLAY

The rose and perennials here will thrive in clay soils in a sunny site, though boxwood, cranesbill, and dark purple bugbane are equally happy in part shade. Prune the rose in late winter to keep it in check, and site it where you can enjoy its sweet fragrance.

|--|--|
| 1 <i>Geranium sanguineum</i>
'Album' | 4 <i>Veronica spicata</i> 'Alba' |
| 2 <i>Rosa</i> WINCHESTER CATHEDRAL | 5 <i>Buxus sempervirens</i>
'Suffruticosa' |
| 3 <i>Actaea simplex</i> 'Brunette' | |

SUMMER SELECTION FOR A GRAVEL GARDEN

Gravel beds provide the free-draining conditions that salvias and spiky yellow-eyed grass enjoy, and they both flourish at the front of sunny beds and borders. A bronze sedge will also be happy in gravel and sun or part shade. Larkspur, however, need more moisture and an annual application of all-purpose granular fertilizer each spring, so leave them out if you cannot provide these conditions.
