

SHRUB LARGE

Cornus sanguinea

BLOODTWIG DOGWOOD The young stems of this deciduous shrub turn reddish green in winter, and the green spring foliage develops a fiery fall color. 'Midwinter Fire' has orange-yellow and red winter shoots. Prune old stems to the ground in late winter.

↑ 10ft (3m) ↔ 8ft (2.5m)

☀️ Z4-7

TREE LARGE

Eucalyptus gunnii

CIDER GUM This slender evergreen tree has smooth whitish green bark that peels in late summer to reveal pink-flushed grayish green young bark, creating a two-tone effect. The rounded, blue-gray young foliage leads to sickle-shaped green leaves.

↑ 80ft (25m) ↔ 50ft (15m)

☀️ Z8-10

BAMBOO LARGE

Phyllostachys viridiglaucescens

GREENWAX GOLDEN BAMBOO Try this clump-forming evergreen bamboo with greenish brown canes, aging to yellow-green, and bright green leaves in blocks in a geometric bed in a modernist scheme.

↑ 25ft (8m) ↔ indefinite

☀️ Z7-11

BAMBOO LARGE

Fargesia murielae

UMBRELLA BAMBOO This large clump-forming bamboo produces arching yellow-green canes and bright green lance-shaped leaves, and makes a beautiful screen. A popular choice for gardens, because it is not very aggressive but is quite cold hardy.

↑ 12ft (4m) ↔ indefinite

☀️ Z5-9

TREE MEDIUM

Prunus serrula

PAPER-BARK CHERRY A deciduous tree, prized for its gleaming, coppery red peeling bark, which looks particularly effective on multistemmed specimens. Oval, tapering dark green leaves that turn yellow in fall, are joined by small white flowers in late spring.

↑↔ 30ft (10m)

☀️ Z5-6

BAMBOO LARGE

Phyllostachys aureosulcata f. *aureocaulis*

GOLDEN GROOVE BAMBOO Use this upright clump-forming bamboo, with yellow canes striped at the base and lance-shaped midgreen leaves, as a screen. Remove the roots to limit its spread or use root barriers.

↑ 20ft (6m) ↔ indefinite

☀️ Z5-10

SHRUB MEDIUM

Rubus cockburnianus

GHOST BRAMBLE The arching prickly shoots of this deciduous shrub are bright white in winter, creating a dramatic ghostly effect. Diamond-shaped dark green foliage follows in spring; inedible black fruits follow the purple summer flowers.

↑↔ 8ft (2.5m)

☀️ Z5-8

SHRUB MEDIUM

Cornus sericea

TWIG DOGWOOD A deciduous shrub grown for its stunning red winter stems, or bright yellow-green in varieties such as 'Flaviramea' (above). The fiery fall leaves are an added attraction. Cut old stems to the ground in late winter.

↑ 6ft (2m) ↔ 12ft (4m)

☀️ Z2-8

BAMBOO LARGE

Phyllostachys nigra

BLACK BAMBOO This large clump-forming evergreen bamboo produces grooved greenish brown canes, which turn black in their second season and look stunning against a light-colored backdrop. The green foliage is lance-shaped.

↑ 25ft (8m) ↔ indefinite

☀️ Z7-11
