

BAMBOO LARGE

Phyllostachys aureosulcata f. *aureocaulis*

GOLDEN GROOVE BAMBOO This clump-forming bamboo has upright, occasionally zig-zagged, pale yellow canes that darken with age, and green vertical stripes at the base. Use root barriers in a small area.

‡20ft (6m) ↔ indefinite

☀️ ☀️ ☀️ Z5–10

BAMBOO LARGE

Phyllostachys nigra

BLACK BAMBOO A clump-forming bamboo with gently arching greenish brown canes, which turn glossy black when mature. Thin out weak stems and prune off lower-level side branches to show off the stems.

‡25ft (8m) ↔ indefinite

☀️ ☀️ ☀️ Z7–11

TREE LARGE

Pinus nigra

AUSTRIAN PINE This exposure-tolerant pine forms a large domed-headed evergreen tree with long needles and yellow-brown cones. The ornamental bark, split by dark fissures, shows irregular patches of caramel and gray.

‡100ft (30m) ↔ 25ft (8m)

☀️ ☀️ ☀️ Z4–7

SHRUB MEDIUM

Rubus cockburnianus

GHOST BRAMBLE This deciduous shrub, in winter, forms strands of prickly arching shoots that have a ghostly white quality. In summer, its stems are concealed by dark green leaves and purple blooms. Inedible black fruits follow the flowers.

‡↔ 8ft (2.5m)

☀️ ☀️ ☀️ Z5–8

TREE MEDIUM

Salix babylonica 'Tortuosa'

DRAGON'S-CLAW WILLOW This deciduous tree is grown for its corkscrewed shoots and narrow wavy leaves, which partially disguise the stems in summer. Its size may be controlled by pollarding. May become invasive.

‡↔ 40ft (12m)

☀️ ☀️ ☀️ Z5–8

TREE LARGE

Pinus pinea

STONE PINE This pine has a characteristic parasol-shaped crown when grown as a single-stemmed tree. The bark is patterned, forming smooth, irregularly-shaped, rusty colored or chestnut plates, outlined by dark fissures.

‡70ft (20m) ↔ 40ft (12m)

☀️ ☀️ ☀️ Z9–11

TREE SMALL

Salix caprea 'Pendula'

PUSSY WILLOW This is a small mushroom-headed weeping tree with long trailing branches. Silver-colored, soft furry catkins form in late winter. Prune to thin the head and maintain an airy framework. Considered invasive in some areas.

‡↔ 6ft (2m)

☀️ ☀️ ☀️ Z6–8

TREE MEDIUM

Prunus serrula

PAPER-BARK CHERRY This deciduous tree is grown for its gleaming coppery red bark that peels as it matures, leaving trunks and stems looking like they have been bound in satin ribbon. Yellow fall leaf color adds to the effect.

‡↔ 30ft (10m)

☀️ ☀️ ☀️ Z5–6

TREE SMALL

Trachycarpus fortunei

WINDMILL PALM This evergreen palm has large fanlike leaves held on long flexible stems that sprout from a central trunk. Young plants have a bushy habit and take several years to develop the woody trunk with its fibrous coating.

‡up to 6ft (2m) ↔ 8ft (2.5m)

☀️ ☀️ ☀️ Z8–10
