

TREE SMALL

Ficus carica

FIG Although in warm climates, this tree or deciduous shrub is grown for its fruits, it lends sculptural interest to ornamental gardens in cooler climates with its gray-green foliage. Grow in a sheltered site. Considered invasive in some areas.

↑10ft (3m) ↔12ft (4m)

☀️ ☀️ ☀️ Z6–9

TREE LARGE

Gleditsia triacanthos

HONEYLOCUST A spreading deciduous tree, grown for its glossy dark green leaves divided into slim oval leaflets, creating a dramatic effect. Long, twisted seedpods in fall add to its charms. 'Rubylace' (above) has dark bronze-red young leaves.

↑50ft (15m) ↔15ft (5m)

☀️ ☀️ ☀️ Z3–8 (N)

PERENNIAL MEDIUM

Helleborus argutifolius

CORSICAN HELLEBORE The dark green spiny-edged leaves of this architectural perennial provide interest year-round. From late winter to spring, clusters of nodding, pale green bowl-shaped flowers appear. Cut back before new blooms appear.

↑24in (60cm) ↔18in (45cm)

☀️ ☀️ ☀️ Z6–9

PERENNIAL MEDIUM

Hosta sieboldiana

PLANTAIN LILY The large rounded leaves of this perennial create a spectacular effect in a shady bed, where their rich blue-green color and puckered texture catch the eye. Spikes of lilac-tinged white flowers appear in early summer. Protect from slugs.

↑3ft (1m) ↔4ft (1.2m)

☀️ ☀️ ☀️ Z3–9

TREE LARGE

***Liriodendron tulipifera*
'Aureomarginatum'**

TULIP TREE A deciduous tree, ideal for big gardens, it is notoriously slow to flower. Its unusual square, yellow-edged green foliage provides interest. Tuliplike pale green summer blooms form on old specimens.

↑100ft (30m) ↔50ft (15m)

☀️ ☀️ ☀️ pH Z4–9 (N)

TREE LARGE

Magnolia grandiflora

SOUTHERN MAGNOLIA Although its large, fragrant white summer flowers are very attractive, this evergreen tree's rounded head of large, glossy dark green leaves also make an eye-catching feature in a sheltered site, or beside a south-facing wall.

↑60ft (18m) ↔50ft (15m)

☀️ ☀️ ☀️ Z7–9 (N)

SHRUB MEDIUM

Mahonia x media

MAHONIA Grown for its large leaves, comprised of dark green hollylike leaflets, this evergreen shrub makes an exciting architectural feature in shady sites. The long fingerlike spikes of small, scented, yellow winter flowers attract bees.

↑6ft (1.8m) ↔12ft (4m)

☀️ ☀️ ☀️ Z7–9

SHRUB LARGE

Melianthus major

HONEYBUSH This evergreen subshrub, grown for its striking sculptural blue-gray leaves, divided into toothed leaflets, and brownish red flowers in late spring. Shelter from cold winds and provide a dry mulch in winter. Can overwinter indoors.

↑up to 10ft (3m)

☀️ ☀️ ☀️ Z8–11

PERENNIAL LARGE

Osmunda regalis

ROYAL FERN This clump-forming deciduous fern, with divided green fronds, pinkish when young and red-brown in fall, makes a focal point in pondside plantings. Mature plants bear tassel-like spikes of rust-brown spores at the ends of tall fronds.

↑6ft (2m) ↔3ft (1m)

☀️ ☀️ ☀️ Z3–10 (N)
