

PERENNIAL LARGE

Rheum palmatum

CHINESE RHUBARB The huge leaves of this upright perennial provide texture and drama. The foliage is dark green, purple-red beneath, jaggedly lobed, and features distinctive veining. In early summer, large plumes of cream to red fluffy flowers form.

☀️ ⚠️ Z4–7

SHRUB MEDIUM

Paeonia delavayi var. *ludlowii*

TIBETAN PEONY Lobed green leaves, blue-green beneath, extend this shrub's appeal, giving interest even after the cup-shaped late spring flowers have faded. Grow at the back of a bed or beside a fence or wall.

↑↔ 8ft (2.5m)

☀️ Z6–9

TREE SMALL

Rhus typhina 'Dissecta'

STAGHORN SUMAC This small deciduous tree or suckering shrub produces large dramatic, finely cut bright green leaves that turn yellow, red, and orange in fall, when cone-shaped maroon fruits also appear. Give it room for the suckers to naturalize.

↑↔ 10ft (3m)

☀️ Z3–8 (N)

PERENNIAL SMALL

Podophyllum peltatum

MAYAPPLE The large glossy leaves of this perennial will lend a sculptural quality to the front of a shady border. Slightly scented white to pale pink single flowers appear beneath the leaves from spring to summer. Ripened fruits are edible.

↑ 18in (45cm) ↔ 12in (30cm)

☀️ Z3–8 (N)

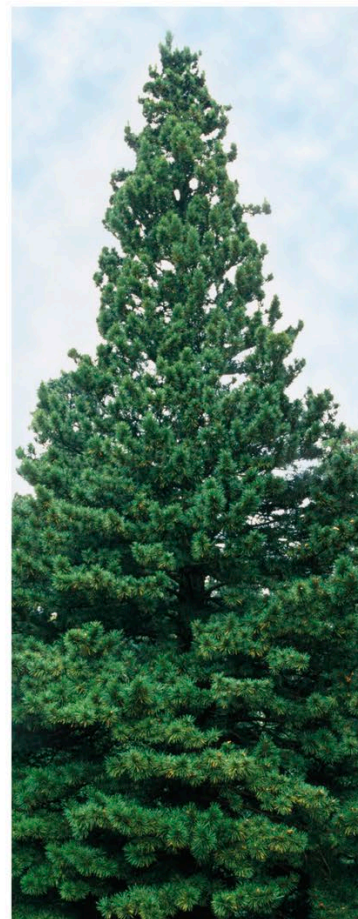

PERENNIAL LARGE

Rodgersia pinnata

RODGERSIA This clump-forming perennial is grown for its large, corrugated, divided dark green leaves. Conical spires of small pink, red, or yellow-white flowers appear in summer. 'Superba' (above) has bronzed-tinted leaves and bright pink flowers.

↑ 4ft (1.2m) ↔ 30in (75cm)

☀️ Z4–7

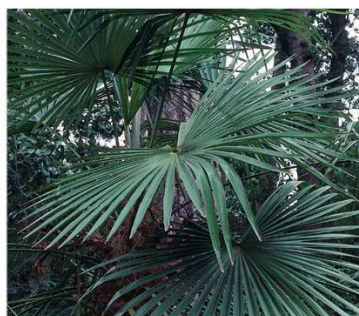

TREE LARGE

Sciadopitys verticillata

JAPANESE UMBRELLA PINE This slow-growing evergreen conifer bears long, linear dark green leaves, which produce an architectural effect. It has textured red-brown bark and oval cones. It makes a good focal feature in a large lawn.

↑ 70ft (20m) ↔ 25ft (8m)

☀️ Z5–8

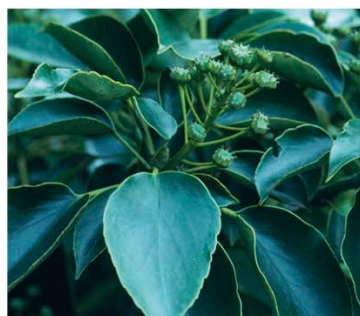

TREE SMALL

Trachycarpus fortunei

WINDMILL PALM The deeply divided fanlike architectural leaves of this evergreen palm are held on an upright stem that becomes fibrous with age. It makes a dramatic focal point in a sheltered position, away from cold drying winds.

↑ up to 6ft (2m) ↔ 8ft (2.5m)

☀️ Z8–10

TREE MEDIUM

Trochodendron aralioides

WHEEL TREE This broadly columnar tree or large shrub produces large, oval, tapering glossy leaves. From late spring to early summer, clusters of unusual, green spider-shaped flowers appear. Shelter from cold, drying winds. Suits tropical-style schemes.

↑ 30ft (10m) ↔ 25ft (8m)

☀️ Z6–10

SHRUB MEDIUM

Yucca filamentosa

ADAM'S NEEDLE The sword-shaped, spiky green leaves of this clump-forming evergreen shrub make it a useful accent plant in a sunny bed or large pot. Tuli-like pendulous flowers appear from mid- to late summer. 'Bright Edge' (above) is variegated.

↑ 6ft (2m) ↔ 5ft (1.5m)

☀️ Z4–11 (N)
