

Trees for small gardens

Large plants can actually make small gardens look bigger by blurring the boundaries and creating the impression that the space extends further.

When selecting trees for a small garden, choose compact varieties that won't loom over the whole plot, and site taller specimens on the north and east sides of your property where they will create the least shade. Opt for slim or vase-shaped trees to fit into corners and a spreading species to create a shady feature in the center of your garden. Also consider seasonal interest when making your choices. Evergreens are tempting since they afford year-round color and privacy, but deciduous trees that produce spring blossoms, fruits, and fall tints offer great value as well.

TREE SMALL

Acer palmatum 'Atropurpureum'

JAPANESE MAPLE A small bushy-headed tree with purple-red summer foliage that turns fiery red in fall. Older specimens form a pleasing tracery of branches in winter. Plant in shelter to prevent scorch.

±25ft (8m)

☀️ ☀️ ☀️ Z6-8

TREE SMALL

Amelanchier laevis

ALLEGHENY SERVICEBERRY An upright shrub or small spreading tree with bronze-tinted young leaves, maturing to green, and finally becoming orange-red in fall. White spring blossom is followed by red to purple, round edible fruits.

±25ft (8m)

☀️ ☀️ ☀️ ☀️ Z4-8 (N)

TREE LARGE

Betula nigra

RIVER BIRCH The peeling bark of this upright deciduous tree creates an eye-catching texture, and looks especially effective when contrasted with the yellow spring catkins. Its diamond-shaped green leaves turn yellow in fall.

±50ft (15m) ↔30ft (10m)

☀️ ☀️ ☀️ Z4-9 (N)

TREE LARGE

TREE SMALL

Betula pendula 'Youngii'

YOUNG'S WEeping BIRCH This weeping form of silver birch has gray-white bark and a wide spreading crown of cascading branches that reach the ground. Brownish yellow catkins appear in spring and the foliage turns yellow in fall.

±25ft (8m) ↔30ft (10m)

☀️ ☀️ ☀️ Z2-6

TREE LARGE

Betula utilis var. *jacquemontii*

HIMALAYAN BIRCH Grow this eye-catching white-stemmed birch as a multistemmed tree to enhance its effect as a lawn or bed specimen. The yellow dangling catkins and yellow fall foliage color are added attractions.

±60ft (18m) ↔30ft (10m)

☀️ ☀️ ☀️ Z4-7

Carpinus betulus 'Fastigiata'

EUROPEAN HORNBEAM This large tree, with its young, columnar form and flame-shaped mature crown, is perfect to be grown in limited spaces. The oval toothed leaves have a pleated look and turn yellow in fall.

±80ft (25m) ↔70ft (20m)

☀️ ☀️ ☀️ Z4-8

TREE SMALL

Cercis chinensis

CHINESE REDBUD Grow this small multibranched tree in a sunny space to encourage good crops of the vivid pealike flowers. The flowers are unusual in that clusters sprout direct from the wood, before the heart-shaped leaves appear.

±20ft (6m) ↔15ft (5m)

☀️ ☀️ ☀️ Z6-9
