SHRUB LARGE

Photinia x *fraseri*

RED TIP This evergreen shrub is grown for the color of its new leaves, many cultivars have been selected for bright red emerging foliage. White flower clusters appear in spring, followed by red fruits that persist through winter into spring.

↕↔10ft (3m)

Z7–9

TREE LARGE

Picea pungens 'Koster'

COLORADO SPRUCE This bright silvery blue evergreen conifer makes a handsome lawn specimen with its relatively slow growth, symmetrical form, and stiff needlelike leaves. Upright cones form toward the ends of the branches. Adapts to all but wet soil.

↕50ft (15m) ↔15ft (5m)

pH Z2–7 Ⓝ

SHRUB LARGE

Pittosporum tobira

JAPANESE PITTOSPORUM Grow this evergreen shrub as a hedge or use to form a neat dome shape in a sheltered site. Its oval leaves form attractive whorls. Sweetly scented, creamy white late-spring-flower clusters are followed by decorative capsules.

↕30ft (10m) ↔10ft (3m)

Z8–10

TREE MEDIUM

Taxus baccata 'Fastigiata'

IRISH YEW This evergreen conifer has a naturally narrow upright form, and is used as an exclamation mark in a border or to create a formal avenue of columns on either side of a path. This female plant bears red fruits. All parts are toxic.

↕30ft (10m) ↔12ft (4m)

Z6–7

TREE SMALL

Trachycarpus fortunei

WINDMILL PALM With an upright stem that becomes fibrous with age, and large, deeply cut fanlike leaves, this evergreen palm makes a dramatic focal point in a border or large container of soil-based potting mix. Plant it in a sheltered site.

↕6ft (2m) ↔8ft (2.5m)

Z8–10

TREE LARGE

Quercus palustris

PIN OAK Planted at the end of a large lawn, this tall pyramid-shaped oak would make a striking focal point. Apart from the attractive shape, the lobed leaves turn brilliant crimson-red and reddish brown in fall, offering interest.

↕70ft (20m) ↔40ft (12m)

Z4–8 Ⓝ

SHRUB MEDIUM

Yucca filamentosa

ADAM'S NEEDLE The sword-shaped, spine-tipped leaves of this evergreen make a useful accent in gravel gardens or large pots. 'Bright Edge' (above) is particularly striking. From mid- to late summer, tall stems carry white blooms.

↕6ft (2m) ↔5ft (1.5m)

Z4–11 Ⓝ
