

SHRUB LARGE

Itea virginica

VIRGINIA SWEETSPIRE This spreading shrub thrives on sheltered slopes protected from prevailing winds. It bears arching stems of spiny dark green leaves and, from midsummer to early fall, decorative greenish white racemes.

↑10ft (3m) ↔5ft (1.5m)

☀️ ☀️ 🌿 Z5–9 (N)

PERENNIAL MEDIUM

Luzula sylvatica

GREATER WOODRUSH Use this clump-forming evergreen perennial as ground cover on a shady slope. 'Aurea' (above) has glossy green grassy leaves that become yellow-green from winter to spring, and tiny brown flowers from late spring to early summer.

↑16in (40cm) ↔18in (45cm)

☀️ ☀️ Z4–9

PERENNIAL SMALL

Geranium macrorrhizum

BIGROOT GERANIUM This easy-to-grow perennial covers a slope or bank with a carpet of aromatic leaves. Magenta blooms appear in early summer. Second flush may follow. Grow in partial shade in areas with hot summers.

↑15in (38cm) ↔24in (60cm)

☀️ ☀️ ☀️ Z4–8

SHRUB SMALL

Juniperus procumbens

DWARF JAPANESE JUNIPER This compact evergreen conifer is often used as ground cover on banks and sloping sites, where its dense, prickly green leaves offer a mat of color. It bears small round brown or black fruits. Plant it in sun or light shade.

↑8in (20cm) ↔30in (75cm)

☀️ ☀️ ☀️ Z4–9

SHRUB SMALL

Microbiota decussata

RUSSIAN ARBORVITAE Useful as ground cover on sunny sloping sites, this low-growing or prostrate evergreen coniferous shrub bears green, scalelike leaves, which turn bronze-purple in winter. Yellow-brown fruits appear in fall.

↑3ft (1m) ↔indefinite

☀️ ☀️ Z3–7

SHRUB SMALL

Lonicera pileata

PRIVET HONEYSUCKLE This spreading dense evergreen shrub is tolerant of the dry conditions on a sloping site. It covers the ground with stems of glossy dark green leaves. Violet-purple berries follow the white funnel-shaped late spring flowers.

↑24in (60cm) ↔8ft (2.5m)

☀️ ☀️ ⚠️ Z5–9

BULB MEDIUM

Narcissus 'February Gold'

DAFFODIL This reliable daffodil copes well with free-draining sloping sites, while the short stems resist wind damage. It bears narrow midgreen leaves and scented yellow early spring flowers. Plant the bulbs in groups in fall, and let them naturalize.

↑12in (30cm)

☀️ ☀️ ☀️ ⚠️ Z3–9

PERENNIAL SMALL

Hepatica nobilis

LIVERLEAF A low-growing semievergreen perennial, ideal for a shaded sloping garden, where it will form a neat dome of rounded, lobed, fleshy green leaves and, in early spring, cup-shaped white, pink, blue, or purple blooms.

↑3in (8cm) ↔5in (12cm)

☀️ ☀️ Z5–8

SHRUB MEDIUM

Rhododendron yakushimanum

YAKUSHIMA RHODODENDRON Native to windswept mountainsides in Japan, this evergreen shrub, with leathery dark green leaves and bell-shaped, pink-budded white spring flowers, is ideal for sloping gardens.

↑→6ft (2m)
