

PERENNIAL LARGE

Darmera peltata

UMBRELLA PLANT A spreading perennial grown for its large, round, deeply veined leaves that can become larger than dinner plates, and turn red in fall. In spring, it bears white or pale pink flower clusters on hairy stems, before the foliage appears.

‡4ft (1.2m) ↔24in (60cm)

💧 Z5-7 (N)

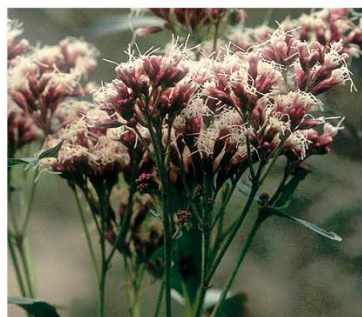

PERENNIAL MEDIUM

***Carex elata* 'Aurea'**

BOWLES' GOLDEN SEDGE An evergreen perennial sedge with arching golden-yellow leaves. Triangular stems bearing blackish brown flower spikes appear in summer. Plant at the edge of a bed or pond for a grassy effect.

‡28in (70cm) ↔18in (45cm)

💧 Z5-9

PERENNIAL LARGE

Eupatorium cannabinum

HEMP AGRIMONY This is a tall upright perennial with large divided leaves held on red stems. From late summer to early fall, it produces clusters of fluffy light pink or purple flowers, which are attractive to butterflies.

‡5ft (1.5m) ↔4ft (1.2m)

💧 Z3-9

PERENNIAL MEDIUM

Carex muskingumensis

PALM BRANCH SEDGE This sedge is a deciduous perennial with light green grassy foliage, which turns yellow before dying back. In spring, it produces small insignificant flowers, followed by attractive, brown seedheads. Cut back in fall.

‡↔30in (75cm)

💧 Z4-8 (N)

PERENNIAL LARGE

Filipendula rubra

QUEEN OF THE PRAIRIE An upright perennial with large aromatic leaves divided into jagged-edged green leaflets and, in midsummer, feathery plumes of tiny, soft rose-pink flowers, which pale as they age. Use it to spread through a boggy site.

‡up to 8ft (2.5m) ↔4ft (1.2m)

💧 Z3-8 (N)

PERENNIAL MEDIUM

Carex pendula

PENDULOUS SEDGE An evergreen perennial sedge with long, green grassy leaves. In summer, greenish brown catkinlike flowers dangle from arching, triangular stems. Best in wildlife gardens or wild areas, where it will self-seed freely.

‡3ft (1m) ↔up to 5ft (1.5m)

💧 Z5-9

PERENNIAL LARGE

Eutrochium purpureum

JOE PYE WEED This is a stately, upright perennial with coarse oval leaves held on purplish green stems. From late summer to early fall, it produces fluffy pinkish purple flower heads on tall sturdy stems. Ideal for wildlife gardens.

‡7ft (2.2m) ↔3ft (1m)

💧 Z4-9 (N)

PERENNIAL LARGE

Filipendula purpurea

JAPANESE MEADOWSWEET This is a large, upright, clump-forming perennial with deeply divided green leaves. In late summer, it produces large clusters of tiny, rich reddish purple flowers, held on tall leafy stems.

‡4ft (1.2m) ↔24in (60cm)

💧 Z4-9

PERENNIAL MEDIUM

Geum rivale

WATER AVENS This perennial forms neat rosettes of rounded green leaves. From late spring to summer, slender stems topped with nodding, bell-shaped pink or dark orange blooms appear. Plant it at the front of a bed; it may self-seed and spread slowly.

‡↔24in (60cm)
