

PERENNIAL LARGE

Physostegia virginiana var. *speciosa*

OBEDIENT PLANT An erect perennial with lance-shaped, toothed-edged green leaves and spikes of hooded, two-lipped rose-purple flowers in late summer. 'Variegata' (above) has white-edged leaves.
↑4ft (1.2m) ↔24in (60cm)

☹ Z3–9 (N)

PERENNIAL LARGE

Primula florindae

GIANT COWSLIP A clump-forming perennial with oval green leaves and clusters of fragrant, bell-shaped nodding flowers on slim stems in summer. Deadhead to prevent self-seeding and to encourage repeat flowering.
↑4ft (1.2m) ↔3ft (1m)

☹ Z3–8

PERENNIAL SMALL

Primula japonica

JAPANESE PRIMROSE This deciduous perennial produces rosettes of oval, toothed-edged, pale green leaves. In early summer, clusters of tubular, deep red flowers appear on stout stems. 'Miller's Crimson' (above) has deep crimson flowers.
↑↔18in (45cm)

☹ Z4–8

PERENNIAL MEDIUM

Primula vialii

ORCHID PRIMROSE This clump-forming perennial produces rosettes of oval green leaves. In late spring, tapering cones of small, tubular bluish purple and red flowers appear on slim stems above the leaves.
↑24in (60cm) ↔12in (30cm)

☹ Z5–8

PERENNIAL LARGE

Salvia uliginosa

BOG SAGE This tall, upright, branching perennial has oblong to lance-shaped, deeply toothed, slightly sticky midgreen leaves. From late summer to fall, two-lipped blue flowers appear. The stems require staking; mulch well in fall.
↑6ft (2m) ↔3ft (1m)

☹ Z6–10

PERENNIAL LARGE

Sanguisorba canadensis

CANADIAN BURNET This perennial has a clump-forming habit, and produces midgreen divided foliage that turns red in fall. From late summer to early fall, it produces upright spikes of bottlebrush-like white flowers on sturdy stems.
↑6ft (2m) ↔24in (60cm)

☹ Z3–8 (N)

TREE LARGE

Taxodium distichum

BALD CYPRESS This is a broadly conical deciduous conifer with feathery green foliage that turns yellow-brown in late fall before dropping. Small oval cones appear in summer. It is a large tree, best suited to large yards.
↑130ft (40m) ↔28ft (9m)

☹ 卐 Z5–11 (N)

PERENNIAL MEDIUM

Trollius x cultorum

GLOBEFLOWER An upright, clump-forming perennial with lobed, toothed-edged dark green leaves. From late spring to early summer, it produces buttercup-like, bowl-shaped semidouble flowers. 'Lemon Queen' (above) has pale yellow blooms.
↑24in (60cm) ↔18in (45cm)

☹ Z3–7
