

Plants for ponds

Reflections of colorful aquatic plants in pools of sparkling water create a magical scene in a yard or garden, large or small, in an open, sunny site.

You can plant a tiny, formal water feature in an urban garden, or a wildlife pond in a rambling plot, to create a textural backdrop. Use plants with different foliage forms, such as strap-leaved cattail alongside the spear-shaped leaves of arrowhead. Add a splash of color with bright yellow marsh marigold and scarlet monkey flower for hot schemes or cool-hued waterlily, iris, and calla lily for a pastel palette. Check plant labels for the correct planting depths. While some plants like their roots completely submerged, others are happier languishing in the shallows.

PERENNIAL SMALL

Caltha palustris

MARSH MARIGOLD This is a deciduous perennial marginal with rounded dark green leaves and clusters of cup-shaped bright golden-yellow flowers, which appear on upright stems above the foliage in spring. Also suitable for pond perimeters.

Z6-9 (N)

WATER PLANT MEDIUM

Alisma plantago-aquatica

WATER PLANTAIN A deciduous perennial marginal with large, oval bright green leaves held well above the water. It produces slim branching stems of small pale pink to white flowers in summer. May be aggressive. The leaves may irritate skin.

↑30in (75cm) ↔18in (45cm)

Ⓜ Z5-8 (N)

PERENNIAL SMALL

Eriophorum angustifolium

COTTON GRASS This is a small, vigorous, spreading perennial marginal with grasslike green leaves. Downy white flowers that resemble cotton tufts appear on slim stems in summer. Contain in a pond basket to restrict its spread.

↑18in (45cm) ↔indefinite

Ⓜ Z5-9 (N)

PERENNIAL SMALL

Calla palustris

BOG ARUM A spreading deciduous or semievergreen, perennial marginal with heart-shaped, glossy dark green leaves. In late spring, it bears large, white petal-like "spathes," followed by red or orange berries in fall. All parts of the plant are poisonous.

↑10in (25cm) ↔12in (30cm)

Ⓜ Z4-8 (N)

PERENNIAL MEDIUM

Iris laevigata

JAPANESE WATER IRIS This is an upright, clump-forming perennial marginal with sword-shaped, smooth midgreen leaves. In early summer, it produces rich purple flowers with gold marks on the lower petals on tall slim stems.
