

PERENNIAL MEDIUM

Iris laevigata 'Variegata'

JAPANESE WATER IRIS This is an upright, clump-forming perennial marginal with sword-shaped white- and green-striped foliage. The purple-blue flowers, which appear in summer, sometimes bloom a second time in early fall.

‡3ft (1m) ↔20in (50cm)

⚠ Z4–9

PERENNIAL MEDIUM

Iris versicolor

BLUE FLAG This is an upright, clump-forming perennial marginal with sword-shaped leaves. In early summer, it produces blue-purple flowers on branched stems. 'Whodunit' (above) bears purple-edged white flowers with purple veining.

‡32in (80cm) ↔indefinite

Z3–9 (N)

PERENNIAL SMALL

Juncus effusus f. *spiralis*

CORKSCREW RUSH An evergreen perennial marginal or bog plant with leafless tubular stems that twist and curl and are often prostrate. In summer, it produces small greenish brown flowers that seed easily; deadhead to keep in check.

‡12in (30cm) ↔24in (60cm)

Z6–9 (N)

WATER PLANT SMALL

Menyanthes trifoliata

BOG BEAN This perennial marginal has unusual upright green leaves divided into three leaflets held at the end of floating, spreading stems. Clusters of small fringed white flowers open from cerise buds in early spring.

‡9in (23cm) ↔indefinite

Z4–8 (N)

PERENNIAL MEDIUM

Mimulus cardinalis

SCARLET MONKEY FLOWER This is a spreading perennial marginal, often grown as an annual, with small, toothed, downy green leaves. Masses of two-lipped tomato-red flowers cover the plant from summer to early fall.

‡3ft (1m) ↔24in (60cm)

Z6–9 (N)

WATER PLANT LARGE

Nuphar lutea

YELLOW POND LILY This is a vigorous, spreading, deep-water aquatic perennial, with round, floating green leaves, similar to those of a water lily. In summer, buttercup-like flowers that smell like alcohol appear on stalks above the foliage.

↔5ft (1.5m)

Z3–9 (N)

WATER PLANT LARGE

Nymphaea 'Escarboucle'

HARDY WATERLILY A deep-water aquatic perennial with dark green, floating deciduous leaves. In summer, cup-shaped, deep crimson flowers with bright golden-yellow centers appear. It spreads and is best suited to larger ponds with calm water.

↔10ft (3m)

Z4–11

WATER PLANT SMALL

Nymphaea pygmaea 'Rubra'

HARDY WATERLILY This aquatic perennial has round, floating green leaves with red undersides and purple blotches. It bears rose-colored cup-shaped blooms from mid- to late summer, maturing to garnet-red. Ideal for smaller ponds; requires still water.

↔16in (40cm)

Z4–11 (N)
