

WATER PLANT SMALL

Orontium aquaticum

GOLDEN CLUB A deep-water deciduous aquatic perennial that helps to keep pond water clear. It produces blue-gray floating leaves and, in spring, pencil-like gold and white flower spikes. Restrict its spread by planting in a large pond basket.

†18in (45cm) ↔30in (75cm)

Z6–10 (N)

WATER PLANT SMALL

Persicaria amphibia

WATER SMARTWEED A vigorous perennial marginal with lance-shaped, dark green floating leaves. From midsummer to fall, it produces conical clusters of pink flowers on stout stems above the foliage, followed by glossy brown fruits.

†12in (30cm) ↔6ft (2m)

Z3–9 (N)

PERENNIAL SMALL

Ranunculus aquatilis

WATER CROWFOOT This perennial marginal is one of the best flowering oxygenators, helping keep pond water clear. It bears mats of ivy-shaped, toothed leaves and yellow-centered, buttercup-like white floating flowers in summer.

†1/2in (1cm) ↔indefinite

Z5–8

PERENNIAL LARGE

Sagittaria latifolia

BROADLEAF ARROWHEAD This large, vigorous perennial marginal is grown for its large, arrow-shaped green leaves. In summer, it produces small white flowers with yellow centers on leafless stems.

†5ft (1.5m) ↔24in (60cm)

Z5–11 (N)

PERENNIAL SMALL

Sagittaria sagittifolia

JAPANESE ARROWHEAD A perennial marginal, grown for its upright, arrow-shaped midgreen leaves. In summer, it produces clusters of three-petaled white flowers with dark purple centers. The cultivar 'Flore Pleno' is double-flowered.

†18in (45cm) ↔12in (30cm)

Z5–9

WATER PLANT MEDIUM

Ranunculus flammula

LESSER SPEARWORT This is a spreading perennial marginal with narrow, spear-shaped lobed leaves. In summer, it bears masses of buttercup-like, single yellow flowers on wiry stems. The plant is toxic, and the sap causes skin irritation.

†28in (70cm) ↔30in (75cm)

① Z5–9

PERENNIAL MEDIUM

Pontederia cordata

PICKEREL WEED This is an upright perennial marginal with large, spear-shaped, glossy midgreen leaves. In late summer, dense spikes of blue flowers emerge on stout stems. Varieties include 'Alba' with white flowers.

†30in (75cm) ↔18in (45cm)

Z3–11

PERENNIAL MEDIUM

Saururus cernuus

LIZARD'S TAIL This is a perennial marginal that produces clumps of heart-shaped midgreen leaves and long, slim stems of creamy white flowers in summer. Possibly aggressive, restrict its spread by planting in a large pond basket.

†3ft (1m) ↔indefinite

Z5–10 (N)
