

PERENNIAL LARGE

***Schoenoplectus lacustris*
subsp. *tabernaemontani***

CLUB RUSH A tall, upright, spreading perennial aquatic sedge with leafless, grassy stems. Brown flower heads appear in summer. 'Zebrinus' (above) has creamy yellow leaves with horizontal stripes.

‡5ft (1.5m) ↔ indefinite

Z6–9 (N)

PERENNIAL LARGE

Thalia dealbata

POWDERY ALLIGATOR FLAG This evergreen perennial marginal has large, oval gray-green leaves that are dusted with white powder. In summer, it bears long stems topped with small purple flowers.

‡5ft (1.5m) ↔ 24in (60cm)

Z6–11 (N)

PERENNIAL LARGE

Typha latifolia

BROADLEAF CATTAIL A large, vigorous perennial marginal with slender grasslike foliage. It bears sausage-shaped dark brown flower heads in summer. The plant is aggressive; best in large ponds, confine to a planting basket to prevent it spreading.

‡8ft (2.5m) ↔ 24in (60cm)

Z3–11 (N)

PERENNIAL MEDIUM

Typha minima

DWARF CATTAIL This small cattail is a perennial marginal with grasslike midgreen leaves. It produces spikes of short, sausage-shaped blackish brown flower heads in late summer. Suitable for smaller ponds and patio water features.

‡24in (60cm) ↔ 12in (30cm)

Z3–11

PERENNIAL LARGE

Typha angustifolia

NARROWLEAF CATTAIL A tall, vigorous, clump-forming perennial marginal with arching grasslike leaves. Sausage-shaped, dark brown flower heads appear in summer. The plant is aggressive; restrict its spread by planting in a large pond basket.

‡5ft (1.5m) ↔ indefinite

Z3–11 (N)

PERENNIAL MEDIUM

Zantedeschia aethiopica

CALLA LILY This is a perennial marginal or bog plant with large, arrow-shaped dark green leaves. In summer, it produces white petal-like spathes, each with a yellow spike in the center. 'Crowborough' is a popular variety.

‡3ft (1m) ↔ 24in (60cm)

! Z8–10

PERENNIAL MEDIUM

***Zantedeschia aethiopica*
'Green Goddess'**

CALLA LILY A semievergreen perennial marginal with large dark green leaves and green hoodlike "spathes" with splashes of white in the throat and yellow central spikes in summer. Suitable for bog gardens.

‡3ft (1m) ↔ 24in (60cm)

! Z8–10
