

Plants for beside hedges, walls, and fences

Plants grown beside walls and fences soften the hard surfaces with flowers and foliage, while hedges provide a leafy backdrop to colorful blooms.

The soil close to a man-made vertical surface may be in a rain shadow and will remain dry, even after a heavy downpour. Likewise, hedging plants soak up large volumes of water, drying out the soil next to them. Drought-tolerant plants that cope well in these conditions are the same as those that enjoy sandy soil, and include species, such as lamb's ears and juniper from rocky areas, and others, such as spurge and rosemary, from Mediterranean regions. A sunny, south-facing wall is the perfect location for many tender plants, providing the heat and shelter they need to survive outside all year in cooler climates.

PERENNIAL SMALL

Antennaria dioica 'Rubra'

PUSSYTOES A mat-forming semievergreen perennial with tiny, oval woolly leaves and small clusters of fluffy rose-pink flower heads from late spring to early summer. Ideal for planting along the bottom of hedges.

↑6in (15cm) ↔12in (30cm)

☀ Z3-9 (N)

PERENNIAL LARGE

Boltonia asteroides

FALSE ASTER This is a tall branching perennial with linear gray-green leaves and sprays of tiny, white daisy-like flowers, which appear starting in late summer. Reduce stems by one-third in spring to prevent them from flopping.

↑6ft (2m) ↔3ft (1m)

☀ Z4-8 (N)

PERENNIAL LARGE

Agastache foeniculum

ANISE HYSSOP This perennial has an upright habit and lance-shaped midgreen leaves that smell and taste like licorice. In late summer, it produces spikes of fluffy lavender-blue flowers, which are attractive to bees and butterflies.

↑4ft (1.2m) ↔12in (30cm)

☀ Z4-9 (N)

PERENNIAL LARGE

Anemone x hybrida

JAPANESE ANEMONE This upright, branching perennial bears divided dark green leaves and white or pink flowers from late summer to early fall. It is useful for late season color. 'Queen Charlotte' (above) has pale pink flowers.

↑4ft (1.2m) ↔indefinite

☀ Z4-8

SHRUB LARGE

Argyrocitrusus battandieri

PINEAPPLE BROOM A rounded deciduous shrub with gray-green leaves divided into leaflets and silky when they unfurl. Spikes of yellow pineapple-scented flowers appear in late summer. Prefers acidic soil and the protection of a south-facing screen.

↑↔12ft (4m)

☀ ㅅ (N) Z7-9

PERENNIAL LARGE

Artemisia ludoviciana

WESTERN MUGWORT A bushy perennial with aromatic, lance-shaped, toothed, silvery gray woolly leaves and slender plumes of tiny brownish yellow summer flowers. 'Silver Queen' has silver leaves. May spread aggressively in some areas.

↑4ft (1.2m) ↔24in (60cm)

☀ Z4-9 (N)

SHRUB LARGE

Buddleja alternifolia

FOUNTAIN BUTTERFLY BUSH This vigorous deciduous shrub produces arching stems bearing narrow gray-green leaves. Long clusters of fragrant lilac-purple flowers appear in early summer. The stems can be trained to form a small weeping tree.

↑↔12ft (4m)

☀ Z6-9

BULB MEDIUM

Calochortus venustus

WHITE MARIPOSA This early summer-flowering bulb has gray-green grassy foliage and white, yellow, purple, or red cup-shaped flowers with a yellow-margined dark red blotch on each petal. Grow in dry soil beside a sunny wall.
