

CLIMBER LARGE

Schizophragma integrifolium

CHINESE HYDRANGEA VINE This is a large, self-clinging deciduous climber with heart-shaped green leaves. It produces clusters of tiny flowers with petal-like bracts resembling lacecap hydrangea blooms in summer.

‡ 40ft (12m)

☀ Z5–9

CLIMBER LARGE

Solanum crispum 'Glasnevin'

CHILEAN POTATO TREE This is a large semievergreen scrambling climber with slim, oval green leaves and clusters of fragrant violet-blue flowers with yellow eyes from summer to fall. Grow it in a sheltered, sunny site.

‡ 20ft (6m)

☀ ⚠ Z9–11

CLIMBER LARGE

Stauntonia hexaphylla

STAUNTONIA VINE A twining evergreen climber with rounded leaves divided into oval leaflets. Clusters of fragrant, violet-tinged white flowers appear in spring, followed by egg-shaped purple fruits on female plants. Grow it in a sheltered site.

‡ 30ft (10m)

☀ Z9–10

CLIMBER MEDIUM

Thunbergia alata

BLACK-EYED SUSAN VINE This moderately fast-growing perennial twining climber, grown as an annual, has toothed, oval to heart-shaped leaves and rounded, flat, dark brown-centered orange or golden-yellow flowers from early summer to early fall.

‡ 10ft (3m)

☀ Z10–11

CLIMBER LARGE

Vitis coignetiae

CRIMSON GLORY VINE A vigorous, deciduous tendril climber with large, heart-shaped textured leaves that turn red and purple in fall. Small black berries follow insignificant green summer flowers. Grow it on a large wall or an arbor.

‡ 50ft (15m)

☀ Z5–9

CLIMBER LARGE

Trachelospermum asiaticum

STAR JASMINE This is a large evergreen twining climber with small, glossy dark green leaves. Small, scented, star-shaped, buff-centered cream flowers that mature to yellow appear in summer. Grow it on a sunny, sheltered wall.

‡ 20ft (6m)

☀ Z7–11

CLIMBER LARGE

Trachelospermum jasminoides

STAR JASMINE A twining evergreen climber with glossy dark green leaves that turn bronze in winter. Clusters of fragrant starry white flowers appear in summer. Grow it on a sunny, sheltered wall.

‡ 28ft (9m)

☀ Z8–10

CLIMBER MEDIUM

Tropaeolum speciosum

FLAME CREEPER A twining perennial climber with rounded blue-green leaves divided into oval leaflets. Scarlet flowers appear in summer, followed by spherical, bright blue fruits. Grow it through a tree with the roots shaded. Best in fertile soil.

‡ 10ft (3m)

☀ Z8–11

CLIMBER LARGE

Vitis vinifera 'Purpurea'

GRAPE VINE This deciduous tendril climber is grown for its lobed, mapelike purplish leaves that turn bright crimson in fall. Unpalatable purple berries follow the pale green summer blooms. Grow on a wall or an arbor. Considered invasive in some areas.

‡ 22ft (7m)

☀ Z6–9
