

EMPHASIZING THE FOCAL POINT

The focal point of this painting of a gymnast is her legs and neck, and this is where the lightest and darkest marks have been placed next to each other. To emphasize this focal point, the

distracting detail of the gymnasium has been replaced with a soft background wash. The gymnast's leotard merges into this wash, which also helps to keep attention on the legs.

The lightest and darkest tones meet to focus attention on the feet.

The light areas on the face are set against mid-tones to limit attention.

The body blends into the background to keep your focus on the legs.

Gymnast In this painting, the lightest and darkest tones meet at the gymnast's neck and up through her legs and feet. Grouping many of the details together tonally helps to outline this focal point.
